

Network policy

-
1. Connect to Wifi network Fadenlauf-2
 2. Use password watchout
 3. Enter your name when asked and wait for 20 seconds

Older devices might not detect the network environment (Captive Portal). If no popup window is automatically shown, open <http://www.ghii.org> in a browser, enter your name when asked and wait for 20 seconds.

Sometimes (usually when changing networks), a manual re-login is required; either through the Sign-in feature of your device, or by manually open <http://www.ghii.org> in a browser.

As a default policy no Internet access is granted during the day (from 7 am to 6 pm). Privileged accounts may be granted by a network administrator. These privileged accounts have a daily data bundle of ~150 MB download and ~100 MB upload during the day. Once these limits are exceeded, network access for this device is revoked for the rest of the day.

Please note that network and Internet access is granted for work and educational purpose. Abuse in any way is neither desired nor allowed.
